

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Stated Meeting, October 16, 1863.

Present, seven members.

Prof. A. D. BACHE, in the Chair.

Letters acknowledging publications, were received from John S. Stevenson, Librarian of Congress, and Richard Kippist; from J. H. Cook, asking information; and from John Penington & Son, with a notice of new publications.

Donations for the Library were received from the British Association, Royal Geographical, Linnean, and Geological Societies of London, the Geological Society of Dublin, the Rev. S. Haughton, J. W. Dawson, of Montreal, the Connecticut Historical Society, the Academy of Natural Sciences, and Blanchard & Lea, of Philadelphia.

Mr. Peale laid before the Society several specimens of the *Geastrum hygrometricum*, both in the living and in the dried states, and described the growth and habits of the plant. He also exhibited minute cryptogams resembling bird's nests and eggs.

The following persons were then duly elected members of the Society.

Robert Briggs, Civil Engineer, of Philadelphia.

Joseph Lesley, Geologist, of Philadelphia.

And the Society was adjourned.

Stated Meeting, November 6, 1863.

Present, sixteen members.

Dr. Wood, President, in the Chair.

Mr. Briggs, Dr. Washburne, and Dr. Penrose, recently elected members, were introduced to the President, and took their seats.

Letters announcing donations to this Society were read
